One CS Major Elective must be a restricted CS elective
One IT Major Elective must be a restricted IT elective

The dual major requires 5 additional courses beyond the basic SCS major (IT350, IT360, IT430, restricted IT elective, unrestricted IT elective).
The free elective may NOT count for one of these 5 courses, per USNA policy.
So there must be at least 5 courses "below the line" in the matrix shown on MIDS.

Unless the mid has a validation, it is strongly recommend that Hum/SS1 be
taken in summer school as Dean's approval is necessary for 24 credits.
