

Grading of Final Presentations

Project Title _____

Group Members _____

Grader _____

Please evaluate each project presentation with a score for each of the following components. For each category, please give a grade of 0, 1, or 2. Also answer the questions at the bottom.

1. _____ What: a clear overview must be given.
2. _____ Why: the features and use for the project must be presented.
3. _____ How: the new interface should be taught effectively. It should also include a block diagram and code snippets.
4. _____ When: problems encountered, and a breakdown of time allocation should be given.
5. _____ Lessons: a list of lessons learned should also be given.
6. _____ Conclusion: a conclusion and demonstration should end the presentation.
7. _____ Length: presentation should be between 7-10 minutes.
8. _____ Participation: each group member must present.
9. _____ Readable: the presentation should be easy to see.
10. _____ Audible: the presentation should be easy to hear, and eye contact should be made.
- _____ Total: please add lines 1-10.

What one or two things did you **like most** about this group's presentation? This does not need to come from the above list.

What one or two things do you recommend that this group work to **improve** on? This does not need to come from the above list.
