Each department should have a sufficient number of faculty members present who are thoroughly familiar with its program to talk with the midshipmen. The department should give a short presentation of the salient features of the major which can be repeated as necessary. Every attempt should be made to answer all the questions of each midshipman.

b. The assigned rooms in Maury and Sampson Halls will be available on Friday, 04 January 2019 to facilitate any needs to set up equipment and displays.

c. Each of the organizations using classrooms in Maury and Sampson Halls is responsible for returning the spaces to their original configurations at the end of the briefings, especially since the spring semester commences the following day.

d. Plebe Academic Advisers and other interested faculty members are welcome to attend the ADAA briefing at the start of each of the two sessions and then visit with the departments so as to provide good counsel to their advisees about majors offerings.
