

## **Live From The Sun – An Educator Workshop**

**U.S. Naval Academy, Annapolis**

**Saturday, April 13, 2019**

**8:30 a.m. – 2:30 p.m.**

Learn about the Sun, create models that explain the Sun's patterns and the reasons for seasons, and model the scale of the Solar System. See demonstrations of the Sun's patterns and motions in the Academy's Planetarium. View the Sun safely through portable solar telescopes and find out how to borrow one for your classroom. Hear the latest research about the Sun and see the latest solar images from NASA spacecraft.

This workshop will provide demonstrations of classroom activities, take-home materials from NASA, lunch and a \$125 stipend for each participating educator, and is presented by the Maryland Science Center in partnership with the U.S. Naval Academy and made possible through a grant from NASA.

To register, contact Jim O'Leary at the Maryland Science Center at [oleary@mdsci.org](mailto:oleary@mdsci.org) and provide your name, school, grade and subject taught and email address. The workshop is open to teachers at all grade levels.
