The United States Naval Academy (USNA) STEM Center will host a one-week residential summer STEM workshop for middle and high school teachers. The focus will be on project-based learning across a broad range of science and engineering topic areas.

Inviting educators to discover, explore, and test ideas, learn how science and technology impact real-world research and challenges.

The United States Naval Academy (USNA) STEM Center will host a one-week residential summer STEM workshop for middle and high school teachers. The focus will be on project-based learning across a broad range of science and engineering topic areas.

Choice of two sessions.
Session begins Monday (5 PM), ends Thursday (5 PM).
Room and board provided at St. Johns College, a short walk to USNA. Travel stipends available, from home in USA.
A limited number of one week positions are available for returning teachers to serve as mentors.

“This training is by far the best training in STEM that I have had!”
- Marilou Brooks
